# Wastewater Replacement Project: Surveying in your area

Charlotte Water is conducting preliminary engineering work in your area for an important wastewater replacement project that will expand the future capacity of the wastewater system in your area.

Over the next several weeks, a subcontractor for Charlotte Water will be surveying along Irwin Creek tributaries in the Clanton Park/Roseland and Yorkmont neighborhoods. Work will include inspections and surveys of manholes and sewer lines along the route, in the public Right-of-Ways. In some areas flags and stakes may be placed in the vicinity of the existing sewer and customers are asked to not remove these stakes, as they are imperative to completing the design of this project. Crews will be working between 8 a.m. and 5 p.m. and do not expect any disruption to customers from this work.

While it's early in defining the capacity and exact alignment for the replacement wastewater line, Charlotte Water plans on hosting community meetings later this year to share more details with area residents and businesses about the project and any proposed plans. People in the area will be invited to learn more, ask questions and share feedback with Charlotte Water and its engineers. The goal for all future wastewater replacement projects is to meet future capacity needs in the areas we serve.

**QUESTIONS:** Should you have questions about this work or the project, please contact Will Rice, project manager at Charlotte Water at (704) 578-9734, [wrice@charlottenc.gov](mailto:wrice@charlottenc.gov).
